

SURESH KRISHNA R

Data Analyst | Villupuram | rsureshkrishna02@gmail.com | 9342470575 | www.linkedin.com/in/sur-kri104

SUMMARY

Entry-level Data Analyst with expertise in transforming raw data into actionable insights using SQL, Python, Excel, and Power BI. Possess a strong foundation in data extraction, data preprocessing, data modeling, ETL concepts, reporting, statistical analysis, and dashboard development. Experienced in writing optimized SQL queries, building analytical reports, and supporting data-driven business decisions. Skilled in developing dashboards, KPI reports, and data visualizations to support business reporting and analytical requirements.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, EDA, KPI Reporting, Statistical Analysis, Dashboard Design and Data Visualization.
SQL Skills: Joins, Complex Queries, Subqueries, Aggregate Functions, Views, Triggers, Query Optimization, CTEs, Window Functions.
Tools & Tech: MS Excel, MySQL Workbench, Python (Pandas, NumPy), Power BI, Claude AI, OpenAI, Agentic AI.
Databases & Data Concepts: MySQL, Cloud SQL, ETL Concepts, Data Modeling, Data Quality and Validation Checks.

PROJECTS

Sales Performance Analysis for Revenue Optimization

- Analyzed product-wise and region-wise sales data using Excel and SQL to identify revenue trends and sales patterns.
- Built an interactive Power BI dashboard with KPI tracking and visual reports, enabling faster business performance analysis.

Lease Management SQL Project

- Designed and implemented a Lease Management System using SQL and MySQL to manage property, tenant, and payment details.
- Used SQL queries, joins, aggregate functions, and subqueries to analyze revenue, tenants, and maintenance data.

Vehicle Rental System

- Built a Vehicle Rental Management System to manage vehicle bookings, customer details, and rental records.
- Designed and managed the database using SQL with features such as booking management, rental history, and report generation.

Video Analytics

- Built a real-time video analytics and monitoring system using the YOLOv8 object detection model.
- The system detects unauthorized entry into restricted areas.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering	Nov 2022 - May 2026
SKP Engineering College - Thiruvannamalai - CGPA: 8.20/10	
12th Grade	2022
VRP Higher Secondary School - Villupuram - Percentage: 69.8%	
10th Grade	2020
VRP Higher Secondary School - Villupuram - Percentage: 99.8%	

CERTIFICATIONS & COURSES

- **Google Cloud Data Analytics:** Developed proficiency in analyzing, visualizing, and interpreting data using BigQuery and Looker to support cloud-based, data-driven decision-making.
 - **IBM: Data fundamentals:** Acquired foundational knowledge of data and data-related skills in data science, analytics, and visualization.
 - **TCS iON: Master data management:** Learned data governance, data quality management, and organizational data management practices for analytics-driven decision-making.
 - **Google Cloud Engineering:** Acquired hands-on skills in deploying, managing, and scaling applications on Google Cloud.
 - **Data Analysis:** Completed training in SQL, Python, and Power BI at Besant Technologies to enhance data analysis skills.
-

ACHIEVEMENTS

- Presented 10+ technical papers at national-level conferences and symposiums on data analytics and emerging technologies.
 - Built multiple end-to-end analytics dashboards using Power BI for real-world datasets.
-

ADDITIONAL INFORMATION

- **Languages :** English, Tamil
- **Soft Skills :** Analytical Thinking, Problem-Solving, Communication, **Presentation abilities**, Collaboration, Leadership, Teamwork.
