

SURESH KRISHNA R

Data Scientist | Data Analyst

Chennai, Tamil Nadu | rsureshkrishna02@gmail.com | +91-9342470575 | linkedin.com/in/sur-kri104

PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate with knowledge of Python, SQL, Machine Learning fundamentals, data annotation, data analysis, and Microsoft Excel. Skilled in data preprocessing, data validation, and data classification to deliver accurate, high-quality results. Hands-on experience in developing end-to-end data analytics and machine learning solutions that generate actionable insights and support data-driven decision-making. Proficient in data cleaning, exploratory data analysis (EDA), and working with real-world datasets using Pandas, NumPy, and Matplotlib.

CORE SKILLS

Data Engineering: ETL Concepts, Data Modeling, Data Quality & Validation, Data Governance, Master Data Management, Data Processing & Transformation

SQL & Databases: MySQL, Joins, Subqueries, Window Functions, Aggregate Functions, Views, Triggers, Query Optimization

Productivity & Tools: Microsoft Excel, Microsoft Word, Microsoft Office, MySQL Workbench, Power BI, Google BigQuery

Technical Skills: Python (Pandas, NumPy, Matplotlib, Seaborn, Tensorflow), OOPS, SQL (MySQL), Data Science, Artificial Intelligence, Machine Learning

Data Analysis & BI: Data Collection & Preparation, Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Power BI Dashboard Design, KPI Reporting & Tracking, Business Performance Analysis.

Soft Skills: Problem-Solving, Analytical Thinking, Communication Skills, Collaboration, Presentation, Leadership

PROJECTS & ANALYTICAL EXPERIENCE

E-Commerce Product Review Sentiment Annotation

- Collected and annotated 1,000+ product reviews, classifying each review by sentiment (Positive, Negative, Neutral) and intent (Complaint, Praise, Query, Suggestion) to build a clean, labelled dataset for model training.
- Performed data cleaning, preprocessing, and quality validation using Python and Pandas — including removing duplicates, handling missing values, and standardising text — achieving 95%+ annotation accuracy across all records.
- Built and evaluated a text classification model using Scikit-learn achieving 87% accuracy, using model predictions to identify and resolve labelling inconsistencies across the dataset.

Sales Performance Analysis for Revenue Optimization

- Analysed sales data using SQL and Python to identify revenue trends, customer behaviour, and business opportunities across large datasets.
- Built interactive Power BI dashboards with KPI tracking, forecasting, and automated reporting aligned with business performance objectives.
- Generated actionable insights to support data-driven business decisions and improve customer engagement outcomes.

Student Performance Analyse

- Analysed student academic performance data using Python (Pandas, NumPy) to identify trends, performance patterns, and correlations across multiple subjects using statistical analysis and grade classification.
- Applied machine learning techniques — feature selection and classification models — to predict at-risk students, generating actionable insights to support data-driven academic decisions.
- Created data visualisations and reports using Matplotlib and Seaborn to communicate performance evaluation findings to stakeholders.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

Nov 2022 – May 2026

SKP Engineering College, Thiruvannamalai | CGPA: 8.20 / 10.00

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Training and Certification – Machine learning:** Machine learning fundamentals, supervised and unsupervised learning, model training and evaluation, feature engineering, data preprocessing, and AI/ML concepts on AWS.
- Google Cloud Data Analytics (Google):** BigQuery, Looker, cloud-based data analysis and natural language data processing
- Data Fundamentals (IBM):** Foundational knowledge of data science, analytics, machine learning, and NLU concepts
- Google Cloud Engineering (Google):** Deployment, management, and scaling of cloud applications on Google Cloud Platform
- Master Data Management (TCS iON):** Data governance, data quality management, SOP-based data operations
